

time	title	Presenter		
9 – 9:45	Quran & Anthem	The presenter	start	20 September 2023
	Vice president of research & Technology of Damghan University	Dr. Kheyri		
	Ecology;an essential science to protect biodiversity	Dr.Saeed Hoseinian		
	Introduction of Damghan University Biology Faculty	The presenter		
	Medicinal plants & their role in biodiversity preservation	Dr.Mohammad bagher Rezaei		
9:45 - 10	Identification of endophytic fungi isolated from Arasbaran Viburnum lantana shrub	Dr.Yousef Mohammadi	presentations	
10 – 10:15	Larger sympatric species tadpoles exhibit correlation between body measurements and a high diversity of food items in Hindukush-Himalayan region	Muhammad Rais		
10:15 – 10:30	Prioritization of Iran's national parks under urban land use	Zahra Nik Nadaf		
10:30 – 10:45	Investigating changes in agricultural land use in forest lands in the protected area between1388 and 1400	Zahra Khorshidi		
10:45- 11	Investigating the effect of fire on the characteristics of the vegetation cover of the wetlands of Qara Qeshlaq Banab	Javad Aslani		
11 – 11:15	Investigating the role of artificial intelligence and digital technologies in monitoring invasive species	Yasaman Arefi Fard		
11:15- 11:30	The role of biodiversity in sustainable development	Dr.Vahid Pouzesh		
14:00 - 14:15	Effects of non-native species on human health and economy	Zeynab Shouhani		
14:15- 14:30	Untangling the evolution of Oriental weaverbirds	Giovanni Forcina		
14:30 – 14:45	Assessment of habitat characteristics of threatened salamanders in Iran	Dr.Saeed Hoseinian		
14:45- 15	Endemic plant diversity of the Iranian Plateau	Dr.Jalil Noroozi		
15-15:15	Gypsum soils are a factor in the endemism of plant species in Semnan city	Dr.Fateme Rabi zade		
15:15-15:30	The role of artworks in increasing the level of environmental awareness	Dr.Sara Sadeghi Nia		
15:30-15:45	The effect of blood containing heparin on the growth and survival of the medical leech Hirudo orientalis	Zahra Damirchi		
15:45-16:00	Environmental factors as drivers for species distribution of the freshwater crabs of Iraq: Potamon magnum and Potamon mesopotamicum	Ammal Gh. Yasser		

9:15 – 9:30	Assessment of the impacts of climate change on droughts in Pakistan based on Standardized Vegetation Index	Syeda Maria Ali	presentations	21 September 2023
9:30 – 9:45	Land Subsidence Crisis in Jiroft Plain, Climate Change or Human Factors	Dr.Hadi Jarahi		
9:45– 10:00	Climate change and global warming: threats and solutions	Ghazale Farahjo		
10:00- 10:15	Screening of endophytic fungi isolated from Arasbaran <i>Viburnum lantana</i> shrub for production of Vincristine	Dr.Yousef Mohammadi		
10:15 – 10:30	Educational tourism and forest protection is a solution for diversifying education	Dr.Hamide Beygi		
10:30-10:45	Earthworm fauna of central Zagros, Iran	Dr.Robabe Latif		
10:45-11:00	Biodiversity Conservation in the Forest Ecosystem Using Fire Distribution Modeling	Dr.Gholamabbas Ghanbarian		
11:00-11:15	The effects of human activities on the destruction of habitats and the loss of biodiversity	Fateme Heydari		
11:15-11:30	Evaluation of the ecological features of the habitat of <i>Gammarus anodon</i>	Bitra Moradi		
11:30-11:45	Invasive plants: today's scourge of Iran and the world	Ghazale Farahjo	Final	
11:45-11:55
